

HALO

HALO Portable

PORTABLE LED STRIP LIGHTING SYSTEM

HALO Portable is a ground-breaking innovation in portable lighting and another world-first by HALO. This versatile and powerful lighting solution is designed to perform across a wide range of applications and environments.

Available in multiple voltage options — including **240VAC (HALO 1)** and **12VDC (HALO 2)** — it offers flexible connectivity with vehicle or battery connectors for maximum convenience. Whether you're camping off-grid, running events, managing construction sites, operating in marine environments, or supporting military operations, or just needing an alternative lighting back-up for your home, **HALO Portable** delivers unmatched reliability, portability, and performance.

For added safety, the **HALO Portable** lighting systems are all fitted with the HALO “fail safe protection” device, which will ensure immediate isolation of the electricity feed should the integrity of the LED strip lighting be compromised, this will ensure complete safety for all users of **HALO** always!

HALO Portable integrates the patented **HALO LED STRIP** designed for underground mines and is built to last! It is **flame retardant** and **100% waterproof**. It incorporates cutting edge technology that provides an ultra-high lumen output lighting system that can manage up to a decade or more of operation.

Supplied in **2.5m**, **5m** and **10m** reels in waterproof carry bags, the **HALO Portable** is also equipped with **extension adaptors** which allows the connection together of **multiple reels** for **long distance** applications in a simple “**plug and play**” manner without the need or any electrical connections whatsoever.
